

TCR-Medicare linked data Request materials and submission

- This draft procedure only for the investigators from UT system.

1. Investigator will send DUA request to TCR (Melanie Williams). Texas Cancer registry will issue requested support documents for investigators and approve data use.
2. Investigator will send a request letter to Dr. Goodwin. The request letter should be clear mention the specific study aims and the type and year of data used for the study.
3. Request a new CMS DUA for reuse of data under CERCIT DUA 21332.
4. CECIT will generate request data set and deliver to UT investigator after received approve documents from 1, 2, and 3. Data core will create a web site to post data request related information.
